

McLogger

This distance logging device ensures that all of the user's private and business kilometres are logged. The user can switch between Private and Business mode with a single button. This logged data can be downloaded to a personal computer and a SARS READY logbook is generated with the help of the easy to use interactive PC software.

SPECIFICATIONS:

- Input Voltage Unit:
5Vdc (USB)
- Input Voltage Adaptor:
12Vdc
- High accuracy GPS
- USB connectivity

FEATURES:

- Switch between Private and Business with a single button.
- LED Mode indication
- Download logs to a computer
- Backup and print a SARS ready logbook
